accessory or attached structures. These drives shall not be considered as structural violations in front and side yards. Further, any walk, terrace or other pavement serving the like function, and not in excess of nine inches above the grade upon which placed, shall for the purpose of this chapter not be considered to be a structure, and shall be permitted in any required yards.

Section 1407 Hazardous Substances

All businesses or industries that store, use or generate hazardous substances as defined in this Ordinance, in quantities greater than 25 gallons or 220 pounds per month whichever is less, shall meet all state and federal requirements for storage, spill prevention, record keeping, emergency response, transport and disposal of said hazardous substances. No discharge to groundwater, including direct and indirect discharges, shall be allowed without required permits and approvals.

Section 1408 Landscaping

1. Purpose.

The purpose of this section is to promote the public health, safety and welfare by establishing minimum standards for the amount, design, installation and maintenance of landscaping.

Landscaping is considered by the Village to be an important element of land development which is a critical factor in maintaining an attractive community character and conserving the value of land and buildings in the Village. In addition to the enhancement of property values, landscaping serves a public purpose by:

- a. Acting as a buffer between adjacent land uses.

- b. Creating privacy between neighboring lots.
- c. Reducing noise pollution, air pollution, and glare.
- d. Reducing flooding by increased floodwater retention.

The landscape standards of this section are considered the minimum necessary to achieve the objectives noted above. In several instances, the standards are intentionally flexible to encourage creative design. Applicants are encouraged to provide additional landscaping to improve the function, appearance and value of their property.

2 **Applicability**

The standards contained in this section shall be applicable to all development which requires a site plan or special exception use permit subject to the following limitations:

- a. These regulations shall not apply to single-family and two-family dwellings.
- b. Expansion or renovation of existing uses that require site plan approval shall adhere to the landscaping requirements of this section insofar as practical. The Planning Commission shall have the authority to increase, decrease or otherwise modify the landscaping requirements of this section.

3. **General Landscaping Requirements**

A minimum of twenty percent (20%) of the parcel shall be landscaped open space. Open space areas shall be landscaped with a minimum of one (1) evergreen tree or shrub for every 1,000 square feet, plus a minimum of one (1) deciduous tree for every 2,000 square feet. A minimum of 33% of the required open space shall be located

between the front building line and the right-of-way line. Corner lots shall have 66% of the required open space between the front building line and right-of-way line.

The following additional landscaping requirements shall be met:

- a. No landscape area shall be used for parking purposes.
- b. No synthetic plant materials such as artificial grass, shrubs, trees, or flowers shall be used to fulfill any landscaping requirements.
- c. Berms, whenever utilized, shall be designed and landscaped to minimize erosion. Berms adjacent to public right-of-way shall have a slope no greater than 3:1 unless designed as part of a retaining wall.
- d. All landscaping materials shall consist of healthy specimens compatible with local climate, soil characteristics, drainage, and water supply. All plant material shall be reasonably resistant to drought and disease.
- e. Grass or other living plants shall be primary ground cover in required landscaped areas. Both sod planting and seeding are acceptable.
- f. Landscaping plans shall be submitted as part of the site plan review process.

4. **Parking Lot Landscaping**

All off-street parking areas except those serving a four family dwelling or less, shall be landscaped according to the following minimum requirements:

- a. Landscape islands within parking lots should generally be at least one (1) parking space in size, with no landscape island less than fifty (50) square feet in area.

- b. Landscape islands shall be no less than five (5) feet wide.
- c. The square footage of landscaped islands within a parking lot shall equal a total of at least sixteen (16) square feet per parking space.
- d. There shall be a minimum of one (1) tree planted in the parking area for every ten (10) parking spaces within parking lots with more than twenty (20) spaces.
- e. Within parking lots, landscape islands should be located to define parking areas and assist in clarifying appropriate circulation patterns.
- f. A landscape island shall be located at the terminus of all parking rows, and shall contain at least one tree.
- g. All landscape islands shall be protected by monolithic curbs or wheel stops and remain free of trash, litter, and car bumper overhangs.
- h. Perimeter landscaping around parking lots shall not be included in the landscaping requirements.

Section 1409 Lot Proportion

The width of any lot, parcel, or land division created after the effective date of this Ordinance shall not be less than twenty-five percent (25%) of the lot or parcel depth.

Section 1410 Non-Conforming Uses 1.

Intent

The lawful use of any building or land at the time of the enactment of this Ordinance may be continued although such use does not conform with the provisions of this ordinance. It is the intent of this chapter to permit these nonconformities to continue until they are removed, but not to encourage their continuation. It is further the intent of this chapter that

nonconformities shall not be enlarged upon, expanded or extended, nor be

used as grounds for adding other structures or uses prohibited elsewhere in the same district. Nonconforming uses are declared by this chapter to be incompatible with permitted uses in the districts involved.

2. Nonconforming lots of record

In any district, a structure and accessory building may be erected on a lot which fails to meet the district requirements for bulk regulations, provided that said lot existed at the effective date of this Ordinance or any affecting amendment. However, the proposed structure and accessory building must still meet the yard dimensions and requirements for the district in which such lot is located. Variance of yard requirements shall be obtained only through action of the Board of Appeals.

If two or more vacant lots or combinations of vacant lots and portions of vacant lots with continuous frontage in single ownership are of record at the time of passage or amendment of this chapter, and if all or part of the lots do not meet the requirements established for lot width and area, the lands involved shall be considered to be an undivided parcel for the purpose of this chapter, and no portion of such parcel shall be used or sold in a manner which diminishes compliance with lot width and area requirements established by this chapter, nor shall any division of any parcel be made which creates a lot with width or area below the requirements stated in this chapter.

3. Nonconforming uses of land

Where at the time of passage of this chapter lawful use of land exists which

would not be permitted by the regulations imposed by this chapter, the use may be continued so long as it remains otherwise lawful, provided:

- a. No such nonconforming use shall be enlarged or increased, nor extended to occupy a greater area of land than was occupied at the effective date of adoption or amendment of this chapter.
- b. No such nonconforming use shall be moved in whole or in part to any portion of the lot or parcel other than that occupied by such use at the effective date of adoption or amendment of this chapter.
- c. If any such nonconforming use of land ceases for any reason for a period of more than one year, any subsequent use of such land shall conform to the regulations specified by this chapter for the district in which such land is located.
- d. No additional structure not conforming to the requirements of this chapter shall be erected in connection with such nonconforming use of land.

4. Nonconforming structures

Where a lawful structure exists at the effective date of adoption or amendment of this chapter that could not be built under the terms of this chapter by reason of restrictions on area, lot coverage, height, yards, its location on the lot or other requirements concerning the structure, such structure may be continued so long as it remains otherwise lawful, subject to the following provisions:

- a. No such nonconforming structure may be enlarged or altered in a way which increases its nonconformity, but any structure or

portion thereof may be altered to decrease its nonconformity.

- b. Should such nonconforming structure or nonconforming portion of structure be destroyed by any means to an extent of more than 50 percent of its replacement cost at time of destruction, it shall not be reconstructed except in conformity with the provisions of this chapter.
- c. Should such structure be moved for any reason for any distance whatever, it shall thereafter conform to the regulations for the district in which it is located after it is moved.

5. Nonconforming uses of structures or of structures and premises in combination

If a lawful use of a structure, or of a structure and land in combination exists at the effective date of adoption or amendment of this chapter, that would not be allowed in the district under the terms of this chapter, the lawful use may be continued so long as it remains otherwise lawful, subject to the following provisions:

- a. No existing structure devoted to a use not permitted by this chapter in the district in which it is located shall be enlarged, extended, constructed, reconstructed, moved or structurally altered except in changing the use of the structure to a use permitted in the district in which it is located.
- b. Any nonconforming use may be extended throughout any parts of a building which were manifestly arranged or designed for such use at the time of adoption or amendment of this chapter, but no such use shall be extended to occupy any land outside such building.

- c. If no structural alterations are made, any nonconforming use of a structure, or structure and premises, may as a special exception be changed to another nonconforming use, provided that the Board of Appeals, either by general rule or by making findings in the specific case, shall find that the proposed use is equally appropriate or more appropriate to the district than the existing nonconforming use. In permitting such change, the Board of Appeals may require appropriate conditions and safeguards in accord with the provisions of this chapter.
- d. Any structure, or structure and land in combination, in or on which a nonconforming use is superseded by a permitted use shall thereafter conform to the regulations for the district, and the nonconforming use may not thereafter be resumed.
- e. When a nonconforming use of a structure, or structure and premises in combination, is discontinued or abandoned for 12 consecutive months or for 18 months during any three-year period (except when government action impeded access to the premises), the structure, or structure and premises in combination, shall not thereafter be used except in conformity with the regulations of the district in which it is located.
- f. When nonconforming use status applies to a structure and premises in combination, removal or destruction of the structure shall eliminate the nonconforming status of the land. Destruction for the purpose of this subsection is defined as damage or dilapidation to an extent of more than 50 percent of the replacement cost at time of destruction.

6. Completion of the Construction of Nonconforming Uses

To avoid undue hardship, nothing in this chapter shall be deemed to require a change in the plans, construction or designated use of any building on which actual construction was lawfully begun prior to the effective date of the ordinance from which this chapter is derived and upon which actual building construction has been carried on diligently. Actual construction is hereby defined to include the placing of construction materials in permanent position and fastened in a permanent manner. Where excavation or demolition or removal of an existing building has been substantially begun preparatory to rebuilding, such excavation or demolition or removal shall be deemed to be actual construction, provided that work shall be carried on diligently.

7. Repairs and maintenance

On any nonconforming structure or portion of a structure containing a nonconforming use, work may be done in any period of 12 consecutive months on ordinary repairs, or on repair or replacement of nonbearing walls, fixtures, wiring, or plumbing, to an extent not exceeding 20 percent of the current replacement cost of the nonconforming structure or nonconforming portion of the structure as the case may be, provided that the cubic content existing when it became nonconforming shall not be increased.

if a nonconforming structure or portion of a structure containing a nonconforming use becomes physically unsafe or unlawful due to lack of repairs and maintenance, and is declared by any duly authorized official to be unsafe or unlawful by reason of physical condition, it shall not thereafter be restored, repaired, or rebuilt except in conformity with the

regulations of the district in which it is located. Nothing in this chapter shall be deemed to prevent the strengthening or restoring to a safe condition of any building or part thereof declared to be unsafe by any official charged with protecting the public safety, upon order of such official.

8. Special Exception Uses are Conforming

Any use which is permitted as a special exception in a district under the terms of this chapter shall not be deemed a nonconforming use in such district, but shall without further action be considered a conforming use.

9. Change of Ownership

There may be a change of tenancy, ownership or management of any existing nonconforming uses of land, structures and premises, provided there is no change in the nature or character of such nonconforming uses.

Section 1411 Parking

1. Purpose and Scope

The purpose of this chapter is to prescribe regulations for off-street parking of motor vehicles, recreational vehicles, trucks, and trailers in residential and non-residential zoning districts, to ensure by the provisions of these regulations that adequate parking and access is provided in a safe and convenient manner, and to afford reasonable protection to adjacent land uses from light, noise, air pollution, and other affects of parking areas.

The following general provisions apply to parking:

- a. At the time any building or structure is erected, enlarged, or increased in capacity, or uses established, off-street parking and loading spaces shall be provided in all zoning districts according to the requirements of this Chapter.
- b. No parking or loading area or space which exists at the time of the adoption of this Chapter shall thereafter be relinquished or reduced in any manner below the requirements established by this Chapter.
- c. Parking areas must be in the same zoning classification as the property it serves.

2. Off-Street Parking Requirements

Off-street parking required in conjunction with all land and building uses shall be provided as prescribed in this section:

- a. For uses not specifically mentioned in this section, off-street parking requirements shall be determined from the requirements for similar uses, as determined by the Planning Commission.
- b. Any area once designated as required off-street parking shall never be changed to any other uses unless and until equal required facilities are provided elsewhere. Off-street parking existing at the effective date of the ordinance from which this chapter was derived in connection with the operation of an existing building, shall not be reduced to an amount less than would be required in this section for such building or use.
- c. Two or more buildings or uses may collectively provide the required off-street parking, in which case the required number of parking spaces shall not be less

than the sum of the requirements for the several individual uses computed separately. However, in cases of dual functioning of off-street parking where operating hours do not overlap, the Board of Appeals may grant a special exception based on the peak hour demand.

- d. Required off-street parking shall be for the use of occupants, employees, visitors and patrons, and shall be limited in use to motor vehicles. The storage of merchandise, motor vehicles for sale or the repair of vehicles is prohibited. Off-street parking, whether public or private, for nonresidential uses shall be either on the same lot or within 300 feet of the building it is intended to serve, measured from the nearest point of the building to the nearest point of the off-street parking lot, without crossing any major street.
- e. When units or measurements determining the number of required parking spaces result in the requirements of a fractional space, any fraction up to and including one-half shall be disregarded, and fractions over one-half shall require one parking space.
- f. The minimum number of off-street parking spaces by type of use shall be determined in accordance with the following schedule
(Table B).

All off-street parking lots as required in this section shall be laid out, constructed and maintained in accordance with **Figure 10** and the following standards and regulations:

- a. No parking lot shall be constructed unless and until a permit therefore is issued by the Zoning Administrator. Application for a permit shall be submitted in such form as may be determined by the Zoning Administrator, and shall be accompanied with two sets of plans for the development and construction of the parking lot showing that the provisions of this section will be fully complied with.
- b. Plans for the layout of off-street parking facilities shall be in accord with the following minimum dimensional requirements as shown in **Figure 10**:
- c. All spaces shall be provided adequate access by means of maneuvering lanes. Backing directly onto a street shall be prohibited.
- d. Adequate ingress and egress to the parking lot by means of clearly limited and defined drives shall be provided for all vehicles. Ingress and egress to a parking lot lying in an area zoned other than single-family

residential use shall not be across land zoned for single-family residential use.

- e. All maneuvering lane widths shall permit one-way traffic movement, except that the 90-degree pattern may permit two-way movement.
- f. Each entrance and exit to and from any off-street parking lot, located in an area zoned for other than single-family residential use, shall be at least 25 feet distant from any adjacent property located in any Single-Family Residential District.
- g. Where the next zoning district is designated as a residential district, a continuous chain link fence or greenbelt strip shall be provided on all sides contiguous to the residential district. The greenbelt strip shall include landscape materials of shrubs and trees that will result in substantial screening of the parking lot and vehicles from the abutting residential districts.
- h. The entire parking area, including parking spaces and maneuvering lanes, required under this section shall be provided with asphaltic or concrete surfacing in accordance with specifications approved by the Planning Commission. The parking area shall be surface within one year of the date the permit is issued. The Planning Commission may waive the surfacing requirements if facts are found and a determination is made by the Village Department of Public Works which poses an infrastructure issue to the village. Upon upgrade of the public infrastructure which rectifies the issue as determined above, the Village of Shepherd shall notify the property owner in writing via certified mail of the completion of said upgrade and shall direct the property owner to comply with the parking area surfacing requirement within one year of receipt of upgrade notification issued by the Village of Shepherd

chapter where it is shown that under such unusual and unique circumstances, no good purpose would be served by such requirements.

- k. Off-street parking lots shall also conform to the parking lot landscaping standards as set forth in **Section 1408** of this ordinance.

4. Loading and Unloading Standards for Off-Street Parking

to said property owner. Off-street parking areas shall be drained to as to dispose of all surface water accumulated in the parking area in such a way as to preclude drainage of water onto adjacent property or toward buildings, and drainage plans shall meet the approval of the Village Department of Public Works.

Effective: August 16, 2006

- i. All lighting used to illuminate any off-street parking area shall be so installed as to be confined within and directed onto the parking area only.

The Planning Commission, upon application of the property owner to the Zoning Administrator, may modify the fence or greenbelt requirements pursuant to this

On the same premises with every building, structure, or part thereof, involving the receipt or distribution of vehicles or materials or merchandise, there shall be provided and maintained on the lot, adequate space for standing, loading and unloading in order to avoid undue interference with public use of dedicated rights-of-way. Such space shall be provided in accordance with **Table C** and as follows:

- a. All spaces shall be provided as required in **Article XII** noted after minimum rear yards, except as provided for the IND District in this section.

- b. All spaces shall be laid out in the dimension of at least ten by 50 feet, or 500 square feet in area, with clearance of at least 14 feet in height. Loading dock approaches shall be provided with a pavement having an asphaltic or Portland cement binder so as to provide a permanent, durable and dustless surface. All spaces in the IND District shall be provided in the following ratio of spaces to floor area:

**Table C
Loading and Unloading Standards**

Gross Floor Area (in square feet)	Minimum Loading and Unloading Space Required
0--1,400	None
1,401--20,000	One space
20,001-100,000	One space, plus one space for each 20,000 square feet in excess of 20,001 square feet
100,001 and over	Five spaces

Section 1412 Performance Standards

No use otherwise allowed shall be permitted within any district which does not conform to the following standards of use, occupancy and operation, which standards are hereby established as the minimum requirements to be maintained within such area:

1. Smoke

It shall be unlawful for any person to cause or permit to be discharged into the atmosphere from any single source of emission, smoke of a density equal to or darker than No. 2 of the Ringelmann chart except:

- a. Smoke of a density equal to but not darker than No. 2 on the Ringelmann chart may be emitted for not more than three minutes in any 30-minute period.
- b. Smoke of a density equal to but not darker than No. 3 of the Ringelmann chart may be emitted for not more than three minutes in any 60-minute period, but such emissions shall not be permitted on more than three occasions during any 24-hour period.

Method of Measurement. For the purpose of grading the density of smoke, the Ringelmann chart, as now published and used by the United States Bureau of Mines, which is

hereby made a part of this chapter, shall be the standard. However, the umbrascopes readings of smoke densities may be used when correlated with the Ringelmann chart.

2. Dust, Dirt and Fly Ash

No person shall operate or cause to be operated, maintained or cause to be maintained, any process for any purpose, or furnace or combustion device for the burning of coal or other natural or synthetic fuels, without maintaining and operating, while using such process or furnace or combustion device, recognized and approved equipment means, methods, devices or contrivance to reduce the quantity of gasborne or airborne solids or fumes emitted into the open air, which is operated in conjunction with such process, furnace or combustion device so that the quantity of gasborne or airborne solids shall not exceed 0.20 grains per cubic foot of the carrying medium at a temperature of 500 degrees Fahrenheit.

Method of Measurement. For the purpose of determining the adequacy of such devices, these conditions are to be conformed to when the percentage of excess air in the stack does not exceed 50% at full load. The foregoing requirement shall be measured by the ASME Test Code for dust-separating apparatus. All other forms of dust, dirt, and fly ash shall be

completely eliminated insofar as escape or emission into the open air is concerned. The building inspector may require such additional data as is deemed necessary to show that adequate and approved provisions for the prevention and elimination of dust, dirt, and fly ash have been made.

3. Open Storage

The open storage of any industrial equipment, vehicles, and all materials, including wastes, shall be screened from public view, from a public street and from adjoining properties by an enclosure consisting of a wall not less than the height of the equipment, vehicles, and materials stored. Whenever such open storage is adjacent to a residential zone in either a front, side, or rear lot line relationship, whether immediately abutting or across a right-of-way from such zone, there shall be provided an obscuring masonry wall or wood fence of at least six feet in height.

4. Glare and radioactive materials

Glare from any process (such as or similar to arc welding, or acetylene torch cutting) which emits harmful ultraviolet rays shall be performed in such a manner as not to be seen from any point beyond the property line, and as not to create a public nuisance or hazard along lot lines. Radioactive materials and wastes, and including electromagnetic radiation such as X-ray machine operation, shall not be emitted to exceed quantities established as safe by the U.S. Bureau of Standards, when measured at the property line.

5. Fire and Explosive Hazards

The storage and handling of flammable liquids, liquefied petroleum gases, and explosives shall comply

with the state rules and regulations, as established by state law.

6. Noise

Objectionable sounds, including those of an intermittent nature, shall be controlled so as not to become a nuisance to adjacent uses.

7. Odors

Creation of offensive odors shall be prohibited.

Section 1413 Private Roads

1. Purpose

The purpose of this section is to regulate the construction, maintenance, and use of private roads in the Village of Shepherd, and to promote and protect the public health, safety and welfare.

2. Applicability

The provisions of this section shall apply to the creation, construction, extension and/or the alteration of all private roads in the Village of Shepherd.

3. Fees

- a. The Village Council shall establish by resolution a schedule of fees to be charged to proprietors with respect to the administration, review and inspection of private roads.
- b. Proprietors making application for the creation, construction, extension and/or the alteration of private roads shall be required to post either a performance or cash bond, or irrevocable letter of credit, in an amount deemed appropriate by the Village to be sufficient for completion of the road, said bond

or irrevocable letter of credit to be discharged upon final approval of the private road and payment of all fees.

4. Minimum Design Standards for Private Roads

- a. The design and construction of all private roads shall comply with the most recently published American Association of State Highway and Transportation Officials (AASHTO), standards for the criteria applicable to the private road, subject to the approval of the Village.
- b. If the private road provides direct access to a County road, approval of the road connection placement and design must be approved by the Isabella County Road Commission prior to Village approval. If the private road provides direct access to a state highway then Michigan Department of Transportation (MOOT) approval must be obtained.
- c. Private roads with only one connection to a County road or state highway or another approved private road meeting the requirements of this section shall not be longer than fifteen hundred (1,500') feet.
- d. All private roads shall be designated by name, subject to approval of the Village and the Isabella County Road Commission. The proprietor shall furnish and erect street name and stop signs at all intersections with both public and private roads. The design of the signs shall be the same as those used by the Isabella County Road Commission for similar purposes. Signs marked "Private Road" shall be erected and maintained by the proprietor at

the entrance to all private roads of

the development.

5. Non-Conforming Private Roads Standards

Notwithstanding any other provisions of this section, private roads, or easements which are contained in land divisions approved by the Village prior to the enactment of this Ordinance, shall continue to meet the specification approved at the time of application. Upon expansion, reconstruction, or alteration of an existing private road, new construction shall comply with the most recently published American Association of State Highway and Transportation Officials (AASHTO) standards for the criteria applicable to the private road. This provision shall be certified on the private road construction documents.

6. Location

- a. A plan of construction, maintenance, and continuing maintenance, including maintenance of road surface, ditches, drainage, repair of potholes, reconstruction, re-paving, snow removal and liability insurance shall be presented by the proprietor. This plan shall guarantee the maintenance in perpetuity of said road, without cost to the Village.
- b. A mandatory Homeowners Association defined as: "a private non-profit corporation, association or other non-profit legal entity established by the developer to manage and support the activities of a housing development, including road maintenance" shall also be established.
- c. All maintenance plans shall either be set forth in deed restrictions for each parcel of the development or placed in a master deed for the

condominium development and shall run with the land in perpetuity. The deed restrictions or master deed shall, at a minimum, guarantee that the Village has no liability for drainage, ditches, and maintenance of the road, nor any liability arising out of the existence and/or condition of the road or the use of the road.

- d. The association shall be responsible for ownership, maintenance, liabilities and payment of taxes on all private roadways and all common areas, including open spaces, in perpetuity.
- e. A special Assessment District may also be formed by the developer and Village to ensure that the Association's obligations are met without liability or expense on the part of the Village.
- f. A document describing the private road and the provisions for maintenance shall be recorded with the register of deeds and provided to all purchasers within the development. The maintenance provisions shall apportion the maintenance responsibilities among the benefiting and/or abutting property owners and shall run with the land. The proposed maintenance agreement shall be reviewed and approved by the Village Attorney prior to being recorded with the Village Clerk and the Isabella County Register of Deeds providing for:
 - i. A method of initiating and financing of such road in order to keep the road up to properly engineered specifications and free of snow or debris.
 - ii. A workable method of apportioning the costs of maintenance and

improvements to current and future users.

- iii. A notice that no public funds of the Village are to be used to build, repair, or maintain the private road.
- iv. The United States mail service and the local school district are not required to traverse this private improvement and may provide service only to the closest public access. (Maintenance of Private Roads Act, PA 139 of 1972, as amended.)
- v. All conditions and requirements concerning public roads shall be deemed the same for private roads, i.e., location on a public road, setbacks (front yard measured from the right-of-way or easement line), etc.

7. Review and Inspection
